Summary

Frontend Developer with **4 years of experience** specializing in building scalable, high-performance web and mobile applications using **React.js** and **React Native**. Expertise in FinTech domains, including core banking (RTGS, NEFT, IMPS), payment platforms, and D2C portals. Proven ability to architect complex systems (Micro-Frontend, Monorepo), optimize application performance, and manage state using modern tools like **Redux**, **Zustand**, and **Jotai**. Dedicated to delivering seamless user experiences and driving high-quality product delivery within cross-functional teams.

Technical Skills

Frontend	React.js, React Native, Next.js, TypeScript , JavaScript (ES6+), HTML5, Tailwind CSS , NativeWind
State Mgt.	Redux, Redux Toolkit, Redux Saga , Zustand, Jotai, Context API
Architecture	Micro-Frontend, Module Federation , Monorepo, Monolith, Modules Chunking
DevOps/Tools	CI/CD, Webpack, Babel, REST APIs, GraphQL, Axios, Jest, React Testing Library (RTL), Chrome Dev-Tools
Emerging	Gen AI (Langchain.js, Langgraph.js), Pinecone DB, Qdrant DB, OpenAI

Professional Experience

Yes Bank (Mar 2024 – Jun 2024)

- Built the Yes Bank Iris Mobile Application using **React Native** and integrated core REST APIs for service support.
- Implemented complex asynchronous workflows for FD and RD modules using **Redux-Saga** for robust state management.

AU Small Finance Bank (Apr 2023 – Mar 2024)

- Maintained and developed applications within a **Monorepo** structure using **React.js** and **TypeScript**.
- Enhanced and built several critical portals (*Admin, Merchant, Sales, Case Review*) using **Redux** and **Redux Toolkit**.
- Wrote and executed comprehensive unit test cases using **Jest** and **React Testing Library (RTL)**, improving code reliability.

PayU (Jun 2021 – Feb 2023)

- Developed payment platform applications leveraging a **Micro-Frontend architecture** with **Module Federation**.
- Delivered performance-optimized code, significantly enhancing the scalability and responsiveness of the payment gateway platform.

Clix Capital (Jun 2021 – Feb 2023)

- Enhanced the D2C portal by identifying performance bottlenecks and delivering high-performance, optimized **React.js** code.
- Collaborated to debug and resolve complex production issues, ensuring application stability and minimal downtime.

Education

2013–2017 **B.Tech in Electrical Engineering**, Meerut Institute of Technology, Meerut, India.
